A legacy of service
continued from cover

Seven Days of Service in Haiti

In March 2010, a group of physicians from the Loyola University Health System traveled to Haiti to help those still reeling from the devastation of the January earthquake. They partnered with health care professionals from around the world to treat the ailing and injured, and recorded their service to the people of Haiti. Watch the video at LUC.edu/haitivideo.

Donor Profile

A Legacy of Service
A son memorializes his father’s work

Dr. Raymond Hillmer, a member of the first group of medical students to graduate from Loyola in 1909, instilled within his son a passion for the practice of medicine. To honor his father’s legacy and love of Loyola, Dr. Philip Hillmer named Loyola’s Stritch School of Medicine as a 50 percent beneficiary of his estate. This generous gift will endow the Raymond E. Hillmer, MD, Scholarship, which will assist students pursuing their medical education at Stritch.

A member of an old Chicago family dedicated to serving others (his great-grandfather was a three-time state senator), Dr. Hillmer says that his family taught him to do the same. “My father had high admiration for Loyola, its remarkable philosophy, and his training there. I consider this the gift he’d have given if he had the opportunity,” he adds.

After completing his medical education at Loyola, the elder Dr. Hillmer practiced in Chicago and La Rose, Ill., before joining the Medical Corps during WWI. He served as a captain, first in Waco, Texas, and then in Siberia. He returned to LaRose in 1918, where he practiced until 1927. For the remainder of his 58-year career he practiced in Michigan’s Upper Peninsula, including time as the staff physician for two mining companies and in private practice.

Like his father, Dr. Philip Hillmer is a war veteran, having served as a pilot in Vietnam before returning to the United States to complete his undergraduate and medical education. He is currently a retired reserve officer. After completing a residency in general and internal medicine at Loyola, Dr. Hillmer specialized in rehabilitation medicine and spent the majority of his career working with veterans as a physician at Bay Pines VA Hospital in Florida. He believes his military service put him in a good position to serve these patients, as his understanding of some of their experiences helped him treat the whole person. “My father had high admiration for Loyola, its remarkable philosophy, and his training there.” — DR. RAYMOND HILLMER

It gives Dr. Hillmer great satisfaction to be able to make this gift in memory of a man who always had time to listen to his patients and never accepted payment from those who could not afford it. “Dad would be very pleased to know that the gift would make it feasible for young medical students to get an education and fulfill their dreams.”

A Legacy of Service

Samaritans Donate Kidneys to Strangers

For the first time, Robert Rohers, right, meets Christina Lamb, the stranger who donated a kidney to him as part of Loyola University Health System’s innovative Pay-It-Forward Kidney Transplant Program. Each program begins when a good Samaritan donor agrees to donate a kidney to a stranger. The donor’s kidney is then given to a compatible transplant candidate who has an incompatible donor, who then agrees to give a kidney to a third person, and so on.

Ms. Lamb is one of four people at Loyola who have offered to donate a kidney, asking nothing in return, thus helping launch Loyola’s program. It is the first of its kind in the Midwest, and the largest number of altruistic donors ever to begin such a program in the United States.

SAFEGUARDING YOUR RECORDS AND DOCUMENTS

Keep an original will in either an attorney’s vault or a bank vault if the bank is acting as executor. Keeping the will in a safe-deposit box can create delays, since many states restrict access to such boxes without court approval.

A will governs the distribution of certain assets after someone dies. But the document really says far more about one’s life than one’s passing. Your will reflects the values and relationships—whether they be with family, friends, your place of worship, or charities—that are most important to you.

Sufficient planning for the following steps will help your executor ensure the smooth, swift, and efficient settlement of your estate:

Locating the Will. If it cannot be found, an estate will be distributed according to the often inflexible intestacy rules of state government. This means any gifts you intended for a favorite family member or charity will never be realized.

Determining Cash Needs. Many estates, particularly those in excess of $500,000, suffer from a severe shortage of cash. Funeral and burial expenses, attorneys’ and appraisers’ fees, taxes, and any debts—all must be paid. To ensure that your assets are distributed to the recipients you intend, it is important to prepare for the liquidity issues your estate may face.

Distributing Assets. The executor’s most pleasant task is distributing estate assets in accordance with the terms of the will. You should first make sure that sufficient funds and property are available to satisfy valid claims, pay taxes, and satisfy specific bequests. If the value of the bequests exceeds the value of the distributable estate, for example, certain bequests may be reduced—or even eliminated.

Because of the dramatic changes brought about by Tax Relief 2001 and the current uncertainty about the eventual shape of the federal estate tax, a checkup of your will is now more important than ever.

A will to give

You have not lived until you have done something for someone who can never repay you.”

— PURITAN JOSEPH PURTAN

Knowing that your generosity has benefited another person or an organization is a satisfaction that can’t be measured in dollars and cents but is priceless nonetheless.

One of the best ways to accomplish this is through your will. By taking a few simple steps when preparing your estate plan, you can maximize the amount that will go to charity and minimize the amount “lost” to taxes.

Have a heart

Bob Hope was known for his wisecracks, but the comedian, who selflessly gave his time and talents over the decades to entertain American troops around the world, understood the intrinsic value of helping others.

“If you haven’t got any charity in your heart,” he once said, “you’ve got the worst kind of heart trouble.”

If you have “charity in your heart,” it is important that you spell out your wishes in your will. You may have mentioned once in passing to pass along Teddy that you would like a favorite charity to receive a certain amount; but unless your will makes that stipulation, it will not happen.

Charitable gifts help perpetuate the ideals and causes you believe in.

How much should you give? The answer lies in your heart—namely, what feels right to you. Whatever your choice, you may be surprised at how the mere act of making this decision and including it in your will will lighten your step and make the world seem friendlier.

Have you not lived until you have done something for someone who can never repay you?” Puritan John Bunyan once wrote.
“You have not lived until you have done something for someone who can never repay you.”

Knowing that your generosity has benefited another person or an organization is a satisfaction that can’t be measured in dollars and cents but is priceless nonetheless.

One of the best ways to accomplish this is through your will. By taking a few simple steps when preparing your estate plan, you can maximize the amount that will go to charity and minimize the amount “lost” to taxes.

Keep an original will in either an attorney’s vault or a bank vault if the bank is acting as executor. Keeping the will in a safe-deposit box can create delays, since many states restrict access to such boxes without court approval.

• Collecting and Safeguarding Assets. The executor must make a detailed record of all property to file with the court, collect all debts, investigate all claims owed by the estate, and manage property responsibly in the estate until liquidation. You will simplify your executor’s job if you leave sufficiently detailed instructions about the location of all your assets, personal records, tax returns, bank statements, and other documents. Note: This information will also be necessary for your executor to determine the taxes due on your estate.

• Determining Cash Needs. Many estates, particularly those in excess of $500,000, suffer from a severe shortage of cash. Funeral and burial expenses, attorneys’ and appraiser’s fees, taxes, and any debts—all must be paid. To ensure that your assets are distributed to the recipients you intend, it is important to prepare for the liquidity issues your estate may face.

SAFEGUARDING YOUR RECORDS AND DOCUMENTS

Personal and financial records, legal documents, the original will, and tax returns are all essential to an efficient settlement of an estate. As such, they should be safely stored and readily accessible when needed. The following chart lists those records and documents that will prove helpful, suggests where they should be stored, and explains why they are important.

<table>
<thead>
<tr>
<th>Records and Documents</th>
<th>Location</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Original Will</td>
<td>attorney’s vault or bank vault (retain copy at home)</td>
<td></td>
</tr>
<tr>
<td>Investment Documents (stock certificates, bonds, certificates of deposit, deeds, and titles)</td>
<td>safe-deposit box required for sale, distribution, or collection</td>
<td></td>
</tr>
<tr>
<td>Insurance Policies</td>
<td>safe-deposit box required to make claims</td>
<td></td>
</tr>
<tr>
<td>Tax Returns</td>
<td>file at home (keep irreplaceable records and receipts in safe-deposit box)</td>
<td></td>
</tr>
<tr>
<td>Asset Inventory</td>
<td>safe-deposit box necessary to locate and collect property</td>

Such programs begin when a good Samaritan donor agrees to donate a kidney to a stranger. The donor’s kidney is then given to a compatible transplant candidate who has an incompatible donor, who then agrees to give a kidney to a third person with an incompatible donor, and so on.

Ms. Lamb is one of four people at Loyola who have offered to donate a kidney, asking nothing in return, thus helping launch Loyola’s program. It is the first of its kind in the Midwest, and the largest number of altruistic donors ever to begin such a program in the United States.

It gives Dr. Hillmer great satisfaction to be able to make this gift in memory of a man who always had time to listen to his patients and never accepted payment from those who could not afford it. “Dad would be very pleased to know that the gift would make it feasible for young medical students to get an education and fulfill their dreams.”

“A legacy of service: A legacy of service – A will to do good – Seven days of service in Haiti

Samaritans donate kidneys to strangers

For the first time, Robert Bobek, right, meets Christina Lamb, the stranger who donated a kidney to him as part of Loyola University Health System’s innovative Pay-It-Forward Kidney Transplant Program. Such programs begin when a good Samaritan donor agrees to donate a kidney to a stranger. The donor’s kidney is then given to a compatible transplant candidate who has an incompatible donor, who then agrees to give a kidney to a third person with an incompatible donor, and so on.

Dr. Raymond Hillmer, a member of the first group of medical students to graduate from Loyola in 1909, instilled within his son a passion for the practice of medicine. To honor his father’s legacy and love of Loyola, Dr. Philip Hillmer named Loyola’s Stritch School of Medicine as a 50 percent beneficiary of his estate. This generous gift will endow the Raymond E. Hillmer, MD, Scholarship, which will assist students pursuing their medical education at Stritch.

A member of an old Chicago family dedicated to serving others (his great-grandfather was a three-time state senator), Dr. Hillmer says that his family taught him to do the same. “My father had high admiration for Loyola, its remarkable philosophy, and his training there. I consider this the gift he’d have given if he had the opportunity,” he adds.

After completing his medical education at Loyola, the elder Dr. Hillmer practiced in Chicago and La Rose, Ill., before joining the Medical Corps during WWI. He served as a captain, first in Waco, Texas, and then in Siberia. He returned to LaRose in 1918, where he practiced until 1927. For the remainder of his 58-year career he practiced in Michigan’s Upper Peninsula, including time as the staff physician for two mining companies and in private practice.

Like his father, Dr. Philip Hillmer is a war veteran, having served as a pilot in Vietnam before returning to the United States to complete his undergraduate and medical education.
