SCIENCE EDUCATION FELLOW ANNOUNCEMENT
SCIENCE IN SOCIETY, NORTHWESTERN UNIVERSITY

Share your passion. Become a mentor.

JOB DESCRIPTION

Science in Society, a Northwestern University research center dedicated to science education and community outreach, is recruiting five Science Education Fellows to work full-time for the Science Explorers mentoring program during the 2016-2017 school year.

Science Education Fellows are recent college graduates with a passion for education and a strong desire to make a tangible difference in the lives of underserved youth in Chicago Public Schools. Fellows work on the front lines of education by tutoring and mentoring small group of high school students. Small group sessions focus on learning science as well as helping youth to build the skills necessary for academic success. Through authentic mentoring relationships with their students, Fellows are able to help close the achievement gap one student at a time.

The ideal Science Education Fellow has a college degree science or engineering, a passion for social justice and improving the life outcomes of youth, is energetic and independent but works well with a team, and has previous experience working with K-12 youth.
