Starting Blocks
(Adapted from Project Zero-Harvard University)

Cut along the outside of the shape and fold along the double lines to form a cube. You may choose to cut out each question and glue them on a wooden cube (found in a craft store).

- As a whole group list as many questions as possible about this topic
- Invent two difficult questions about this topic
- Each player in the group must list one thing they already know about this topic.
- What is the most interesting thing to learn about this topic? What might be the most boring?
- What steps can you take to learn about this topic?
- Give a few reasons why it is important to learn this topic.
