Sequence 2 Summative Assessment:
TLLSC One Minute Monologue: Teacher candidates will build off of their experiences in Sequence 1 as they explore and get to know the unique features of their new Sequence 2 partner school. Teacher candidates will create a culminating one-minute monologue that captures how their intersecting social identities will impact the development of a culturally responsive and effective classroom environment. The monologue will center on one essential question from each Sequence 2 module: TLSC 140, TLSC 150 and TLSC 160 (3 essential questions total). Candidates need to include one data artifact from each module (3 total artifacts), provide a rationale for the inclusion of each artifact in developing their monologue, and an explanation of what it reveals about themselves as future teachers with intersecting positionalities. Teacher candidates will collect data from their self-documentation project (TLSC 140), effective classroom environment action plan (TLSC 150) and curriculum plan (TLSC 160) to provide further evidence to support their monologue. After collecting all data, teacher candidates will utilize their knowledge of culturally responsive practice, social justice and learning environments to develop a monologue that illustrates what they learned about teaching, learning and leading with schools and communities, as well as themselves during this process.

Conceptual Framework Standards Addressed:
- CF 3: Candidates demonstrate an understanding of issues of social justice and inequity.
- CF 4: Candidates demonstrate skills that will enable them to work effectively with diverse clients.

Diversity
The diversity of students, parents, families, homes, and communities is central to this module, and candidates will have the opportunity to explore cultural, linguistic, ability and many other forms of difference. In this way, candidates will: (a) push “beyond the label” to explore the resources and funds of knowledge present within the school, (b) analyze how the school aligns and incorporates
those resources into educational practice, and (c) make suggestions for ways to improve school-based practice with diversity in culture, language, and ability.

Specifically related to ELLs, the strong basis and emphasis on culturally responsive pedagogy and practice in this module will prepare candidates to explore linguistically responsive pedagogy and practice in the upcoming sequence (Sequence 3). A key element for addressing special education will be discussions about how teachers are integrating individual student IEP goals into curriculum as a means of being culturally responsive based upon ability. This module is also a good place to discuss inclusion as a school wide philosophy, rather than an isolated set of practices that occur in individual classrooms.

Technology
Candidates will be expected to demonstrate evidence of professional technology skills through the appropriate use of a variety of instructional software, digital media and internet-based professional materials and resources.
