Module Description The purpose of this module is to provide a background for transition education services - from birth to adulthood - for individuals with disabilities. Candidates will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities. They will look at the specific challenges faced by adolescents with disabilities as transition to adulthood and person-centered planning, an approach that focuses on students assuming emergent adult roles in the community. Additionally, candidates will examine instructional strategies for teaching functional, occupational, and career identification skills in secondary school and community settings. The importance of working collaboratively with family and community members will be emphasized. Current perspectives on self-determination and quality of life issues as they relate to individuals transitioning to adulthood will be introduced.

Person-Centered IEP Project

- **IEP Transition plan review: 30% of final grade**
  - The purpose of this assignment is to support the development of a student transition plan. The candidate will review an individual transition plan (using a format provided in class) for a student with a disability.

- **Student voice project: 30% of final grade**
  - The purpose of this assignment is to support candidates in the development of person-centered IEPs. Candidates will work follow up with the student for whom they reviewed the IEP. They will then work with the student’s teacher to determine what additional information from the student and/or their family would support their involvement in the IEP process as much as possible. This could include preference assessments, career inventories, life skills assessments, transition plans, parent interviews, teacher developed checklists, or person-centered planning.
  - The candidate will work with the student’s teacher to determine the most appropriate form of assessment that meets the needs of the student. Examples also will be provided in class. The candidate will submit a copy of the assessment along with a short reflection regarding how this support increased the level of self-determination for the student. Your primary task is to select the assessment process that best applies to your student and make recommendations for its use. Should the student and/or teacher not be willing to complete the assessment, the candidate must state this information and explain: (1) why they chose this particular assessment for the student, (3) how they might modify the assessment for the student based on their needs, and (3) how they believe the student’s level of self-determination would have been improved as a result of the application of this tool. With the permission of the student, teacher, and family, you are welcome to complete the actual assessment with the student. The reflection then is based on why you selected the tool, how you modified the application, and the connection with improving student self-determination.

- **Sequence 4 Summative Assessment** from TLSC 263 (Transition Planning) will account for approximately 5% of your grade in this class.

School of Education Policies and Information

Conceptual Framework Standards
The School of Education at Loyola University Chicago, a Jesuit and Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance professional education in the service of social justice, engaged with Chicago, the nation, and the world. To achieve this vision the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice. We fulfill this mission by preparing professionals to serve as teachers, administrators, psychologists, and researchers; by conducting research on issues of professional practice and social justice; and by partnering with schools and community agencies to enhance life-long learning in the Chicago area.

Specifically grounded in the overarching principles of Professionalism in Service of Social Justice, this module focuses on the policies and practices that impact the instruction and assessment of diverse students in urban schools, emphasizing the role of the teacher in making educational decisions and advocating for students. Additionally, candidates must demonstrate understanding of educational policy and critically evaluate practices in a variety of classroom and school settings.

Technology/Communication/Electronic Etiquette
Students are expected to check the course page on Sakai weekly for any important communications regarding this class. Supplemental readings and assignments will be posted electronically. All email communication will occur through the Loyola email system. A student tutorial on Sakai is located on the Loyola website. If you are unsure how to use this system, please see the instructor.

Technology is increasingly becoming an integral part of our lives. Although it can be a vital tool, technology can also be an unnecessary distraction. The uses of electronic tools are encouraged in this class, as a means of augmenting the understanding of course content. When the technology interferes with classroom functioning, technology is a deterrent. It is the expectation that members of the class are focused on the course content and actively contributing to the class.

Diversity
By focusing on the policy and practice in urban classrooms, this module addresses multiple perspectives on diversity, including but not limited to: the diversity in students' backgrounds (i.e., culture, language, ability) and classroom and school contexts (e.g., bilingual education, instructional contexts for students with special needs).
