School of Education Policies and Information

Conceptual Framework Standards
The School of Education at Loyola University Chicago, a Jesuit and Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance professional education in the service of social justice, engaged with Chicago, the nation, and the world. To achieve this vision the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice. We fulfill this mission by preparing professionals to serve as teachers, administrators, psychologists, and researchers; by conducting research on issues of professional practice and social justice; and by partnering with schools and community agencies to enhance life-long learning in the Chicago area.

Specifically grounded in the overarching principles of Professionalism in Service of Social Justice, this module focuses on the policies and practices that impact the instruction and assessment of diverse students in urban schools, emphasizing the role of the teacher in making educational decisions and advocating for students. Additionally, candidates must demonstrate understanding of educational policy and critically evaluate practices in a variety of classroom and school settings.

Technology/Communication/Electronic Etiquette
Students are expected to check the course page on Sakai weekly for any important communications regarding this class. Supplemental readings and assignments will be posted electronically. All email communication will occur through the Loyola email system. A student tutorial on Sakai is located on the Loyola website. If you are unsure how to use this system, please see the instructor.

Technology is increasingly becoming an integral part of our lives. Although it can be a vital tool, technology can also be an unnecessary distraction. The uses of electronic tools are encouraged in this class, as a means of augmenting the understanding of course content. When the technology interferes
with classroom functioning, technology is a deterrent. It is the expectation that members of the class are focused on the course content and actively contributing to the class.

Diversity
By focusing on the policy and practice in urban classrooms, this module addresses multiple perspectives on diversity, including but not limited to: the diversity in students’ backgrounds (i.e., culture, language, ability) and classroom and school contexts (e.g., bilingual education, instructional contexts for students with special needs).
