Select Primary Sources

1. Under **Primary Sources**, use the drop-down arrows next to **Video** and **Audio** to select the video and/or audio devices for the recording.
   
   **Note:** You must select an audio or video source in order to record.

2. After you have selected your audio device, speak in the microphone to test the volume.
   a. You want the input levels to remain in the green.
   b. If the levels move into the yellow or red, you will need to use the slider to adjust the input level.
