Purpose

The Purpose of a Course Site
A course site is the official work site for a particular academic course and is limited to a specific academic term.

The Purpose of a Project Site
A project site is not limited to a specific academic term, and can be used to collaborate with colleagues inside and outside of the Loyola community for group works, committees, and research projects. Examples of use of project sites are university committees, registered and sponsored student organizations, student groups, communities, organizations, collaborative research projects, training initiatives, and groups of instructors who will be teaching lab sections.

Creation

How Course Sites Are Created
Course sites are created and populated with other instructors and students automatically, based on regular LOCUS feeds. Refer to the Sakai Administrative Schedule for tentative dates on the creating of course sites.

How Project sites Are Created
Any Loyola students, faculty, and staff can create a project site.
## Roles and Enrollment

### Course Site

<table>
<thead>
<tr>
<th></th>
<th>Instructor</th>
<th>Teaching Assistant</th>
<th>Student</th>
<th>Course Builder</th>
<th>Librarian</th>
<th>Tutor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ability</td>
<td>Read, revise, delete, and add content to site</td>
<td>Read, revise, delete and add most content with access to grades.</td>
<td>Read content, and add content to a site where appropriate</td>
<td>Can read, revise, delete, and add content to a site without access to grades.</td>
<td>Can read and add content with access to tests and grades.</td>
<td>Can read content and add content to a site where appropriate without access to grades.</td>
</tr>
<tr>
<td>Enrollment</td>
<td>Populated from LOCUS.</td>
<td>Through LOCUS or requested by listed site instructor.</td>
<td>Populated from LOCUS.</td>
<td>Through LOCUS or requested by listed site instructor.</td>
<td>Through LOCUS or requested by listed site instructor.</td>
<td>Through LOCUS or requested by listed site instructor.</td>
</tr>
</tbody>
</table>

### Project Site
