Direct reply allows you to insert a comment directly after another user’s comment regardless of the comments’ original order. Specifically, for when replying to a question or providing feedback on a comment.

Note: Direct replies can only be inserted on a VoiceThread that you create.

**Adding a Direct Reply**

1. Select the comment window of person that you want to reply to.

2. Your identity image will appear in the conversation channel under the selected window. The comment window will show the specific person being replied to.

3. Once comment is saved, the new comment will appear in the conversation channel in the correct location.
