

Arrupe College - Accounting - Subject: Arrupe Accounting

ACACT 201(3) Course ID:013000 01-JAN-2021

Introductory Accounting I

The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.

Co-requisite: ACMAT 117

Outcomes: The student will be able to understand the underlying principles, design, concepts, limitations,

Components: Lecture(In person)**Course Equivalent:** ACCT 201, CPST 310, ACCT 201H**Requirement Group:** Co-Requisite: ACMAT 117; Restricted to Arrupe College students.**Room Requirements:** Electronic Classroom(1)

ACACT 202(3) Course ID:013001 01-JAN-2021

Introductory Accounting II

Prerequisite: ACACT 201 Introductory Accounting I

This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.

Components: Lecture(In person)**Course Equivalent:** ACCT 202, ACCT 202H**Requirement Group:** Prerequisite: ACACT 201/ ACMAT 117**Room Requirements:** Electronic Classroom(1)

Arrupe College - Biology - Subject: Arrupe Biology

ACBIO 100(3)

Course ID:013842

15-DEC-2019

Introductory Biology

This course will expose students to the breadth of biological concepts by including cell and molecular biology, organismal structure and function, genetics and heredity, evolution, and ecology. The course will engage students in science as a structured process that generates and refines knowledge through evidence-based decisions. It will emphasize the value and contributions of life science to society.

Outcomes:

1. By the end of this course, you will develop academic skills such as:
 - a. Reading a science textbook to support your learning
 - b. Note-taking and study strategies
 - c. Strategies for succeeding during an exam

Components: Discussion(In person)**Attributes:** Course Approved 2019 - IAI**Requirement Group:** Restricted to Arrupe College Students**Room Requirements:** Electronic Classroom(1)

Arrupe College - Chemistry - Subject: Arrupe Chemistry

ACCHM 100(3)

Course ID:013864

15-JUN-2019

Introductory Chemistry

A course emphasizing the general principles and theories of chemistry, including fundamentals of inorganic chemistry, atomic structure and states of matter, bonding, stoichiometry, acid-base concepts, periodicity and solution chemistry

Outcomes: 1. Understand the structure of matter and the chemical changes it undergoes, and predict those changes based on the periodic nature of the elements 2. Solve problems using chemical calculations concerning mass or concentration. 3. Describe strong and weak acids and bases, and carry out related calculations. 4. Develop the academic skills needed for future science courses including problem-solving, taking and reviewing notes, and multiple choice exams.

Components: Discussion(In person)

Attributes: Course Approved 2019 - IAI

Room Requirements: Electronic Classroom(1)

Arrupe College - Communication - Subject: Arrupe Communication**ACCOM 101(3) Course ID:012985 01-JAN-2022****Public Speaking & Critical Thinking**

This course is designed to supply students with an understanding of critical thinking practices, foundational tenets of communication theory, the skills of public address and persuasion, the role of visual aids in effective presentation, and a sense of the social responsibility that comes with the capacity for communication.

Outcomes: Students gain skills in public speaking, preparing a presentation, including visual aids, and critical listening, thinking, and speaking.

IAI Code: C2 900

Components: Lecture(In person)
Course Equivalents: COMM 101, COMM 103, ACCOM 103
Attributes: Course Approved 2016 - IAI

Room Requirements: Electronic Classroom(1)

ACCOM 103(3) Course ID:014147 02-JAN-2021**Business and Professional Speaking**

Through theory and practice, the course will explore oral presentation in business and professional situations, including message design and audience analysis of organizations. Students will examine expectations for communication in business; after studying and analyzing professional context, students will complete three substantive presentations. Finally, students will gain a sense of social responsibility that comes with the capacity for communication.

Outcomes: Students gain skills in public speaking, preparing a presentation, including visual aids, and critical listening, thinking, and speaking with a focus on professional environments.

Components: Lecture(In person)
Course Equivalents: COMM 101, COMM 103, ACCOM 101
Requirement Group: Restricted to students in the Arrupe College Afternoon Cohort (ACPM) or Sophomore students
Room Requirements: Seminar(1)

ACCOM 200(3) Course ID:013008 15-JUN-2022**Communication and New Media**

This course explores the way technology affects personal, cultural, and mass communication through examining the historical, societal, and ethical implications of new and interactive forms of media.

Outcomes: Students use audio, video and digital tools to research and produce essays, projects and presentations that analyze the impact of technology on communication.

Components: Lecture(In person)
Course Equivalents: COMM 200, ICVM 240
Requirement Group: Restricted to Arrupe College Students
Room Requirements: Electronic Classroom(1)

ACCOM 201(3) Course ID:013007 15-DEC-2014**Introduction to Communication**

This course gives a general and theoretical overview of communication. By approaching communication through a critical and historical lens, students will acquire a foundation for further study and practice in communication.

Outcomes: Students will have an understanding of the nature and structure of communication and be able to critically evaluate oral and written communications.

Components: Lecture(In person)
Course Equivalents: COMM 175
Requirement Group: Restricted to Arrupe College Students
Room Requirements: Electronic Classroom(1)

Arrupe College - Computer Science - Subject: Arrupe Computer Science

ACCOMP 150(3)

Course ID:013282

01-JAN-2020

Introduction to Computing

This course provides a broad survey introducing the many layers of the computer science discipline, emphasizing the computer's role and limitations as a tool for describing, organizing, and manipulating information applicable to many disciplines.

Outcomes: Binary logic expressed in electronic circuitry, machine architecture, basic programming in Python, data organization, machine capacity, and useful tools.

Components: Lecture(In person)

Course Equivalent: COMP 150

Requirement Group: Restricted to Arrupe College Students

Room Requirements: Lab - Computer(1)

Arrupe College - Economics - Subject: Arrupe Economics**ACECO 201(3)** **Course ID:013002** **15-DEC-2014****Microeconomics**

This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.

Outcomes: Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty.

IAI Code: S3 902

Components: Lecture(In person)
Course Equivalent: ECON 201, ECON 201H, CPST 243
Attributes: Course Approved 2016 - IAI
Requirement Group: Restricted to Arrupe College Students
Room Requirements: Electronic Classroom(1)

ACECO 202(3) **Course ID:013003** **15-DEC-2014****Macroeconomics**

This course is an introduction to national product, its components, money and the real sectors and business fluctuations.

Outcomes: The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal and monetary policies of the government, to ultimately understand economic stability and the welfare of the individual citizen.

IAI Code: S3 901

Components: Lecture(In person)
Course Equivalent: ECON 202, ECON 202H, CPST 245
Attributes: Course Approved 2016 - IAI

Arrupe College - English - Subject: Arrupe English**ACENG 110(3)** **Course ID:012986** **15-DEC-2014****Interpreting Literature**

This is a foundational course in literary studies requiring students to read closely and analyze carefully a representative variety of prose, poetry, and drama, master key literary and critical term, and explore a variety of core critical approaches to the analysis and interpretation of literature.

Outcomes: Students will understand the structure and techniques of different literary forms and will be able to analyze the content of literary works with respect to the authors' purposes and meaning.

Components: Lecture(In person)
Course Equivalents: UCLR 100
Requirement Group: Restricted to Arrupe College Students
Room Requirements: Electronic Classroom(1)

ACENG 220(3) **Course ID:013995** **01-JAN-2020****Introduction to Rhetoric: Classical & Contemporary**

This course emphasizes the relevance of classical disputes for understanding current controversies over the nature and function of discourse. We will study several definitions of rhetoric, including rhetoric as "the art of persuasion," as the available means of persuasion, as identification, and others.

Enrollment Conditions: Practical tools and theoretical methods will strengthen your skills in critical thinking, persuasive reasoning, and logical reasoning.

Components: Lecture(In person)
Course Equivalents: COMM 220
Room Requirements: Electronic Classroom(1)

ACENG 271(3) **Course ID:013841** **15-JUN-2019****Exploring Poetry**

This class offers you the opportunity to become proficient in close reading and critical analysis of poetry with different styles, and from several different periods.

Outcomes: 1.) practicing the skill of close reading & developing annotation strategies for literary texts, 2.) mastering key literary terms and integrating them into your own analyses of literature, 3.) placing the poems we read in conversation with their historio-political contexts, 4.) using different literary theoretical lenses to ask new questions of our texts, and 5.) articulating [explaining/stating] your interpretations: in class, on tests, and for written assignments.

Components: Lecture(In person)
Course Equivalents: ENGL 271
Attributes: Course Approved 2019 - IAI, Tier 2 Literary Knowledge
Room Requirements: Electronic Classroom(1)

ACENG 273(3) **Course ID:013840** **15-JUN-2019****Exploring Fiction**

Exploring Fiction focuses on reading and analysis of fiction, especially short stories and novels, from a variety of periods, while examining and applying key approaches to determining literary meaning, form and value.

Outcomes: 1) Critically analyze fiction, especially short stories and novels, from a variety of periods, and apply a narrative theory approach to literary interpretation. 2) Interpret literary texts within various contexts - biographical, social, political, aesthetic, etc.

Components: Lecture(In person)
Course Equivalents: ENGL 273
Attributes: Course Approved 2019 - IAI, Tier 2 Literary Knowledge
Room Requirements: Electronic Classroom(1)

ACENG 274(3) **Course ID:013011** **01-JAN-2022****Exploring Shakespeare**

This course focuses on the dramatic works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance). The class experience includes attendance at and discussion of performances of the Chicago Shakespeare Theater.

Outcomes: Students will be able to demonstrate understanding of the theatrical works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, and the personal, political and theatrical world in which Shakespeare lived and worked.

This course explores the fundamental organizational systems of intentional visual expression through purposeful making of, and critical response to, traditional design concepts. The elements of art and the principles of design will be experienced through a range of media both tactile and digital, with emphasis on spatial perception, color theory, and visual communication.

Students will recognize and experience the core concepts and practices of visual communication through hands-on exercises and projects addressing observation and perception, composition, transformation and manipulation of the picture plane, sequence and narrative, and the physical and communicative properties of pigment and color. Students will further engage these concepts through critical examination of images, texts, and objects representing a wide array of contemporary and historical visual culture. IAI Code: ART 907

This course is a continuation of MATH 117 focusing on exponential, logarithmic, trigonometric, and inverse trigonometric functions, their graphs, and their properties. Techniques for solving equalities involving these functions are examined. Trigonometric identities, sum and difference formulas, double and half-angle formulas, the Laws of Sines and Cosines, and polar coordinates are also considered.

Prerequisite : "C-" or better in ACMAT 117 or required score on placement test.

Outcomes: Students will build and improve their skills in algebra and pre-calculus topics in order to be able solve a variety of problems. The content and the strategies students will learn will prepare them to be successful in Calculus and courses beyond. Students will frequently be asked to express their mathematical

Research Methods in Black World Studies
 Chicago has a growing number of newly formed communities whose ancestors are/were African. Among such populations are Cuban, Haitian, Nigerian, Belizean, and Jamacian peoples. These neo-African communities in Chicago tend to cluster in patterns related to available housing, ethnicity and natality. Many factors including language barriers, educational and employment disadvantages as well as cultural ubiquity often leave these newcomers' needs unattended. This course provides instruction in research methods useful in understanding the social and political needs of such marginalized populations. The primary research model for this course is Participatory Action Research methods.

ANTH 244(3) Course ID:013503 06-JUN-2018**Historical Archaeology**

Historical archaeology views history through the lens of the archaeological record. This course is an introduction to contemporary method and theory in historical archaeology with a focus on the European colonization of North America, including the major topics of reconstructing everyday lifeways and understanding modernization and globalization.

Prerequisites: ANTH 101 or ANTH 104. Recommended: Anth 241.

Outcomes : Students will learn research strategies for using historic artifact analysis and archival documents in interpreting the unique physical evidence of the historical archaeological record.

Components: Lecture(In person)
Requirement Group: Prerequisite: ANTH 101 or ANTH 104
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

College of Arts and Sciences - Anthropology Department - Subject: Anthropology**ANTH 245(3)** Course ID:014298 15-JUN-2022**Gender in Deep Time**

Students will critically reflect on gender in cross-cultural and long-term perspective. From an anthropological perspective, they will also deconstruct their own cultural biases and assumptions. With a deep and critical understanding of contemporary norms, students will apply evidence-based reasoning to examine the construction of gender in the past.

Outcomes: 1) Describe Western ideas of gender and sexuality; 2) identify connections between feminist movements and gender archaeology; 3) apply an intersectional approach to the study of gender both past and present

Components: Lecture(In person)
Attributes: African Studies and the African Diaspora, Women & Gender Studies

Room Requirements: Electronic Classroom(1)

ANTH 280(3) Course ID:001119 06-JUN-2018**Evolution of Human Disease**

The complex interaction between humans and pathogens is explored throughout time, with particular emphasis on the role and impact of human biology, human culture and changing environments.

Outcome: Students will be able to demonstrate understanding of the human immunological system, competing paradigms of human health, the processes and mechanisms of biological evolution, the pathogenesis of specific diseases, and the archaeological, paleopathological, paleodemographic, and historical data used to explore the evolution of disease.

Components: Lecture
Course Equivalents: BIOL 280
Attributes: Bioethics
Req. Designation: Internship
Room Requirements: General Classroom(1)

ANTH 281(3) Course ID:014282 15-JUN-2022**Evolution of the Human Diet**

This interdisciplinary course explores the evolution of the human diet utilizing a biocultural perspective. The complex interplay between our diet, biology, and culture is examined through energy acquisition, primate and hominin nutrition, the Agricultural Revolution and Industrialization on human health, food sustainability, and nutritional inequality through socioeconomic and gender lenses.

Prerequisite: ANTH 101: Human Origins

Students will identify the role food has played throughout the 6-7 million years of human evolution, and its significance in terms of climate change variability, evolutionary adaptations and contemporary inequality.

Components: Lecture(In person)
Course Equivalents: BIOL 281
Requirement Group: Pre-requisite: ANTH 101
Req. Designation: Internship

Human Rights in Latin America

This course examines human rights in Latin America from a multidisciplinary perspective. It asks: what are human rights? Why have human rights abuses occurred and how have Latin Americans responded?

Outcomes: Students will understand the international human rights legal framework, be able to analyze why abuses have occurred, and understand how Latin Americans have mobilized by studying specific cases.

Components: Lecture(In person)

Attributes: Catholic Studies, Global Studies, Latin American Studies, Peace Studies, Sociolegal Studies

Human Evolution

Prerequisite: ANTH 101 or ANTH 103.

This course provides a detailed assessment of the fossil record pertinent to the emergence and evolution of humans up through the origin of modern people. The interpretation of this record within the context of important biological principles is emphasized, as is the methodology of doing historical science with paleontological data.

Outcome: Students will develop an understanding of the course of human biological history from the perspective of the pertinent fossils record as well as a mastery of the biological principles and scientific methodology that apply to assessing that history.

This course will contrast popular ideas about language with scholarly approaches from the fields of linguistic anthropology, linguistics, sociology, ethnic studies, and other disciplines.

Outcomes: Students will demonstrate an understanding of the consequences of linguistic ideology on language policy, language representation and the evaluations of others.

Components: Lecture(In person)
Req. Designation: Undergraduate Research and Writing Intensive

ANTH 332(3) Course ID:013120 15-JUN-2020**Language, Race, and Inequality**

This course addresses how and why languages and speakers are associated with racialized stereotypes, and how linguistic discrimination operates in U.S. culture today. In-depth case studies examine language and race in education, mass media, material culture, and everyday interaction. Critical perspectives on sociolinguistic norms and relationships between language, Whiteness, and power are also included.

Prerequisite: ANTH 100 or ANTH 102, or Instructor permission

Students will identify relationships between language and race in everyday life, recognize and analyze instances of linguistic discrimination, stereotypes, and covert racism. Critical thinking and writing are emphasized.

Anthropology of Museums

This course explores the museum as a dynamic site of cultural production and consumption, and an important sphere for anthropological study. It examines the historical and contemporary relationships between museums, anthropology, and material culture, with particular attention to the broader socio-cultural context of collecting from and representing cultures.

Prerequisites : ANTH 100 or ANTH 102

Outcomes : Students will gain knowledge of museums as sites of anthropological study and practice, with specific attention to an understanding of the formation and use of anthropological collections, and cultural representations. Students will visit, discuss, and critique exhibitions in Chicago-based museums.

Components: Lecture(In person)

Restricted to post-baccalaureate students who have been selected by the Office for International Programs, the Vietnam Center or Beijing Center for the position/s.

This course provides university-based supervision for post-baccalaureate students in the field of student development in a international higher education setting under the direction of a professional mentors. The main purposes are 1) To help form a theoretical understanding of the college student population 2) To provide an opportunity to apply that understanding personally and professionally.

Outcome: Students will be able to describe historical and contemporary perspectives on college student development theories and their application in higher education, including the influence of studying abroad on

Requirement Group: Prerequisite: NEUR 101 and BIOL 251

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)

BIOL 354(3) Course ID:001351 06-JUN-2018

Mammalian Reproduction

Prerequisite: BIOL 251.

Anatomy and physiology of male and female reproductive systems, fertilization, implantation, pregnancy, and birth; immunological aspects of reproduction.

Outcome: Students will understand structure/function relationships in reproductive biology and how reproductive systems are regulated at cellular levels.

Components: Laboratory, Lecture

Requirement Group: Pre-requisite: BIOL 251.

Req. Designation: Undergraduate Research

Room Requirements: General Classroom(1)

BIOL 355(4) Course ID:001352 06-JUN-2018

Parasitology Lec/Lab

A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.

Outcome: Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation.

Components: Laboratory(In person), Lecture

Requirement Group: Pre-requisite: BIOL 251.

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1), General Classroom(1)

The Evolution of Animal Sex

Among animals, sex cannot be simplified down to X₂s and Y₂s, or even males and females. Sex is diverse and dynamic. The class will discuss modern research around three themes: 1) sexual differentiation, 2) animal weapons and ornaments, and 3) reproduction and mating systems.

Pre-Requisites: BIOL 251 and BIOL 282

Outcomes: Students will gain a deeper appreciation of the sexual diversity among animals at genetic, physiological, morphological and behavioral levels.

Components: Lecture(In person)

Requirement Group: Pre-requisite: BIOL 251 and BIOL 282

Req. Designation: Undergraduate Research

Neurobiology

Prerequisite: NEUR 101 and BIOL 251.

The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.

Outcome: Student will gain a solid foundation in nervous system structure and function.

Components: Discussion(In person), Lecture(In person)**Attributes:** Neuroscience**Requirement Group:** Prerequisite: NEUR 101 and BIOL 251**Req. Designation:** Undergraduate Research**Room Requirements:** Electronic Classroom(1), Electronic Classroom(1)

Entomology Lec/Lab

Prerequisite: BIOL 265.

An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience.

Outcome: Students will learn to identify major insect groups in the field and in the laboratory. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.

Components: Laboratory, Lecture**Requirement Group:** Pre-requisite: BIOL 265**Req. Designation:** Undergraduate Research**Room Requirements:** General Classroom(1)

Writing a Scientific Manuscript

A Process from Data Collection to Writing a Scientific Manuscript. This course is designed for upper level students interested in practicing the scientific process; including hypothesis construction, experimental design, data collection, and writing of a scientific paper detailing Introduction, Methods, Results and Discussion.

Prerequisite: BIOL 102,112.

Outcomes: Students would learn to develop hypotheses, design experiments based on those hypotheses, analyze data, and learn to construct and peer-review a scientific manuscript.

Components: Lecture(In person)**Requirement Group:** Prerequisite : BIOL 102, C- or above**Req. Designation:** Undergraduate Research**Room Requirements:** Electronic Classroom(1)

Cell Physiol & Biochem

Prerequisites: BIOL 251 and CHEM 224

An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information pathways, and evolution. BIOL 366 is cross-listed with CHEM 361.

Outcome: Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes. Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned.

Components: Discussion, Lecture**Course Equivalents:** CHEM 361**Attributes:** Forensic Science**Requirement Group:** Pre-requisites: BIOL 251 & CHEM 224 or 222. Bioimaging

Prerequisites: BIOL 251 and 282; PHYS 112 or 114; Instructor Permission.

This course focuses on light microscopy but also includes a section on Electron Microscopy. Topics include basic optical theory, history, sample preparation, microscope operation, digital image acquisition and analysis.

Outcome: Students will become adept at producing publication quality images using a variety of imaging techniques. Students will also learn how to correctly interpret results and properly present their data.

Components: Laboratory(In person), Lecture(In person)
Requirement Group: Prerequisite: BIOL 251 and 282; PHYS 112 or 114

Western Traditions Honors-Antiquity to Middle Ages

This course is restricted to Catholic Studies Minors enrolled in the Honors Program.

This foundational course in the history of Western culture from antiquity to the Middle Ages discusses such writers ranging from Homer all the way to Augustine. Students will pose questions and comments about some of the ideas and texts that helped shaped Western culture, including many that come out of the western Christian tradition.

All Things Ignatian: Living and Learning in the Jesuit Trad

This course explores the founder of the Jesuits, St. Ignatius Loyola and considers his historical context and that of the Jesuits from Renaissance Europe to today. Second, the course will introduce "The Spiritual Exercises," a highly refined and adaptable method of prayer, contemplation and action. Finally, the course will examine Ignatian spirituality as a practical resource for for addressing critical issues in the Church and world today.

Outcomes: Describe the life and history of Ignatius of Loyola and the Society of Jesus. Identify and explain the chief characteristics and major themes of Ignatian spirituality. Locate, analyze, and demonstrate Jesuit apostolate of scholarship and teaching; identify the global contribution to education, particularly to university life. Experience direct service.

Biochemistry majors only, Prerequisites: CHEM 212, 214, 370 and 222 or 226.

This laboratory is designed to simulate a research experience and to teach basic techniques utilized in a biochemistry laboratory. The course theme involves a comparative investigation of the enzyme glyceraldehyde-3-phosphate dehydrogenase (GAPDH) from various animal sources. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on GAPDH from either an aquatic or land animal source, e.g., trout, tuna, pork beef or chicken.

Outcome: Students will be able to purify and characterize an enzyme in a research context.

This laboratory course is designed to simulate a research project in which molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. The course theme involves an investigation on the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedure required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form.

Outcome: Students will study the basic concepts of enzyme structure relationships and how to investigate them. The student will learn strategies to produce and test a hypothesis in this area. Additionally, the

History of Computing

The social and organizational history of humanity is intricately entangled with the history of technology in general and the technology of information in particular. Advances in this area have often been closely involved in social and political transformations. While the contemporary period is often referred to by such names as the Computing and Information Age, this is the culmination of a series of historical transformations that have been centuries in the making. This course will provide a venue for students to learn about history through the evolution of number systems and arithmetic, calculating and computing machines, and advanced communication technology via the internet.

Scientific computing emphasizes data analysis and visualization in a scientific context - analyzing data quickly for understanding by the individual, sharing automated workflows with collaborators, and preparing results for later publication. This course will emphasize rapid, interactive, and reproducible collaborative analysis of data for scientific contribution.

Students are required to have taken MATH 117: College Algebra as a prerequisite or to have been placed in MATH 118: Precalculus or higher.

At the end of this course, students will be well versed in the use of a specific, interactive environment for data analysis (likely Python, R, or MATLAB as indicated in the course notes) for analyzing data and sharing

This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.

Outcomes: Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data.

Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP 180 or COMP/MATH 215
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

Introduction to Computer Systems

This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.

Prerequisites: COMP 141 and (COMP 170 or MATH/COMP 215) and (coreq or preq of COMP 163 or MATH 201). COMP 163 coreq or prereq and COMP 170 prereq preferred.

Outcome: Understanding of system issues that affect the performance, correctness, or utility of user-level programs.

Components: Lecture
Requirement Group: Pre-requisite: COMP 141 and (COMP 170 or COMP/MATH 215) Co-Requisite: COMP 163 or MATH 201

COMP 395(1) Course ID:014017 15-JUN-2020**Professional Development & Career Growth in CS/IT**

This course is designed specifically for students pursuing a degree in computing-related fields, for example, Computer Science, Information Technology, Software Engineering, and Cybersecurity. They will learn about ways to develop themselves professionally, communicate their strengths, expand their contacts, and advance their careers.

Prerequisite: Sophomore standing and any COMP course.

Students should acquire skills to professionally brand themselves, successfully network in technical circles, perform an effective job/internship search, and conduct themselves well in interviews.

Components: Lecture(In person)
Requirement Group: Sophomore standing and any COMP course with a grade of at least C-.

Data Structures I

This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered.

Prerequisite: COMP 400A

Outcomes: Students describe linear data structures and analyze the performance of their operations. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.

Components: Laboratory(In person), Lecture(In person)

Requirement Group: At least C in COMP 400A

Req. Designation: Undergraduate Research

Data Structures II

This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.

Pre-requisite: COMP 400B and COMP 400D

Outcomes: Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm.

Components: Laboratory(In person), Lecture(In person)

Requirement Group: At least C in COMP 400B & 400D

COMP 447(3) Course ID:009716 06-JUN-2018**Intrusion Detection and Computer Forensics**

This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.

Co-requisite or prerequisite COMP 271

Outcome: Students will learn to configure ID systems (eg., snort) and analyze their output. They will also understand both network-based and host-based monitoring techniques.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 448(3) Course ID:009717 06-JUN-2018**Network Security**

This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.

Prerequisite: COMP 271 or COMP 447

This seminar course offers undergraduate students the experiential opportunity to engage in research while building their foundation of research methods. Students may be part of the Loyola Undergraduate Research Opportunities Program (LUROP) through a funded fellowship, or students may be working independently with a faculty mentor (volunteering in a lab, working on a research team). All students must have a research project with a faculty mentor identified prior to enrolling in this course. As an experiential learning course, students will need to be engaging in research with a faculty mentor concurrently to taking this course. Students must work a minimum of 5 - 10 hours each week over the semester on their research projects (10 - 15 hours per week over the summer session). Students will reflect on research experience in the context of understanding research paradigms, application of research methodologies, understanding the implications of ethical research, and preparing to present research professionally. Responsible Conduct in Research and Scholarship

Loyola University actively promotes a culture of responsible and ethical behaviors among all people associated with the University. This includes the LUC faculty, staff, and students of all levels. This course provides students with a strong foundation of the basic ethical principles and professional standards that can then be built upon by future experiences. Topics include the nine identified by Office of Research Integrity critical to research activities as well as those of value to scholars here at LUC.

Taught over a three day period, students will be presented with information and relevant background and given the opportunity to apply these ethical principles in a small group setting.

NOTE: This course satisfies the LUC policy requirements for students that are enrolled in graduate programs,

College of Arts and Sciences - Criminal Justice & Criminology - Subject: Forensic Science**FRSC 340(3) Course ID:011822 15-JUN-2018****Introduction to Forensic Science**

Prerequisites: CJC 101; Forensic Science Majors Only.

This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.

Outcome: Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice.

Components: Lecture(In person)**Attributes:** Forensic Science**Requirement Group:** Prerequisite: CJC 101, Forensic Science Majors only**Req. Designation:** Internship**Room Requirements:** Electronic Classroom(1)**FRSC 341(3) Course ID:011824 15-JUN-2018****Forensic Ethics and Professional Practice**

Prerequisite: FRSC 340; Forensic Science Majors only

This course develops a basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field and professional practice of forensic science.

Outcome: Students will demonstrate an understanding and application of ethics in the forensic sciences. Students will be able to articulate the role and challenges of ethical issues facing forensic science today, the applicability of ethics in the profession and their individual careers.

Components: Lecture(In person)**Attributes:** Forensic Science**Requirement Group:** Prerequisite FRSC 340, Forensic Science Majors Only**Req. Designation:** Internship**Room Requirements:** Electronic Classroom(1)**FRSC 342(3) Course ID:013394 06-JUN-2018****Expert Witness Testimony and Court Room Demeanor**

The goal for this course is to give you the information necessary to be an effective and ethical witness. This should help throughout your career and help make testimony not so much something to be feared as something which represents the culmination of your work in a case.

Prerequisite: FRSC 341

Forensic Science Majors Only

Outcomes: Students should develop courtroom and expert witness testimony literacy, understanding of the dynamics during court and appreciate the impact to the judicial system.

Components: Lecture(In person)**Attributes:** Forensic Science**Requirement Group:** Prerequisite: FRSC 341 Forensic Science Majors Only**Req. Designation:** Internship**Room Requirements:** Electronic Classroom(1)**FRSC 343(3) Course ID:014143 15-JUN-2021****Physical Organic Chemistry for Forensic Science**

An introduction to the foundational principles of physical and physical organic chemistry. The course focuses on the application of these principles to solving problems in forensic science. The numerous aspects of forensic science require a working knowledge of physical chemistry, the foundational principles, and the interrelation of cause and effect.

Prerequisite: CHEM 222 or 224/226; PHYS 112; MATH 132. Forensic Science Majors

Outcomes: Understand the basic concepts of physical and physical organic chemistry; Acquire and interpret data and form conclusions; and Use critical thinking skills in problem solving.

Components: Lecture(In person)**Req. Designation:** Internship**Room Requirements:** Electronic Classroom(1)

FRSC 360(3) Course ID:013395 01-JAN-2021**Forensic Drug Chemistry I**

This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed.

Prerequisites - CHEM 212, CHEM 214, CHEM 224, CHEM 226, FRSC 342; Co-requisites - FRSC 360L; Forensic Science Majors only - Chemistry option.

Outcomes: The techniques, skills, advances and limitations of the modern forensic laboratory discussed. The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting.

Components: Lecture(In person)
Attributes: Forensic Science
Requirement Group: Pre-requisites:CHEM 212, CHEM 214, CHEM 224, CHEM 226, FRSC 342 ; Co-requisite FRSC 360L ; Forensic Science Majors Only

Research in Dance

Faculty serve as mentors for dance students pursuing research opportunities. Platforms cross various domains in cognitive, psychomotor, and artistic development. Students and faculty work together to generate qualitative and quantitative data documented in multiple modalities including: dancemaking, regression analyses, interviews, correlational and case studies. This course satisfies the Engaged Learning-Undergraduate Research requirement.

Must be a declared dance major or minor to enroll.

Outcomes: Students will learn discipline-specific language skills, research ethics and methodologies. Students will gain valuable skills disseminating research through performances, scholarly articles,

Explores some of the fundamental principles, concepts, and historical and contemporary contexts that constitute a contemporary art practice. Provides experience across a range of modes of art making while emphasizing the basic concepts that underlie visual expression. Studio activity is augmented with research, discussion, and critique.

Outcomes: Explore and express visual concepts. Develop creative competencies. Utilize design elements to communicate themes and ideas. Expand cognitive capacities. Comprehend historical and contemporary approaches to visual art.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

FNAR 112(3) Course ID:003044 06-JUN-2018

Two-Dimensional Design

An examination of the basic elements and organizational systems of visual expression through the application of design principles and theory.

Outcome: Students will be able manipulate various forms of media to produce desired spatial effects, and understand how to control by- using such design methods as scale, perspective, and composition - the viewer's understanding of and reaction to visual information on a two-dimensional surface.

Components: Lecture
Course Equivalents: ACFNA 112

Postmodernism

Prerequisites: Graduate status

This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.

Outcomes: Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams.

 Latino/a Literature
 Prerequisites: Graduate standing and consent of the GPD in English.

Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.

Outcomes:

¿ Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a

College of Arts and Sciences - Engineering - Subject: Engineering**ENGR 343(3) Course ID:013744 15-JUN-2022****Medical Device Software Development II**

This is the third semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During four weeks, students increase their programming skills through exposure to advanced data structures and graph algorithms. Separately, software issues that the Food and Drug Administration considers during medical device submissions are highlighted.

Restricted to Engineering Science majors. ENGR 342 with a minimum grade of C-, concurrent enrollment in ENGR 391.

Outcomes: Analyze software issues that the FDA considers during medical device submissions. Create user interface and cybersecurity code, according to Requirements Specifications provided by the instructor

Components: Lecture(In person)

Requirement Group: Prerequisite: ENGR 342 with a minimum grade of C-. Co-requisite : ENGR 391. Restricted to Engineering

Req. Designation: Internship

Room Requirements: ENGR Design Lab(1)

ENGR 351(3) Course ID:013514 15-JUN-2022**Electronic Circuit Analysis and Design**

A course for engineering science students (computer engineering) that introduces advanced topics in the design and analysis of analog and digital electronic circuits. Areas of emphasis include an introduction to semiconductor physics, diodes, BJT transistors, CMOS devices, advanced operational amplifier circuits and frequency response fundamentals.

Restricted to Engineering Science majors. Prerequisites: ENGR 321, ENGR 323, MATH 266 with minimum grades of C-, concurrent enrollment in ENGR313, ENGR 351L

Outcomes: Understand and apply fundamental concepts of semiconductor physics. Understand and apply complex models to analyze analog and digital microelectronic circuits.

Components: Lecture(In person)

Requirement Group: Restricted to Engineering Science majors. MATH 266,ENGR 321,ENGR 323,Concurrent enroll. in ENGR 313 and

A lab for engineering science students (in the computer engineering specialization) to provide a first experience working with semiconductor devices (such as diodes, BJTs, MOSFETs, and Operational Amplifiers) for the design, creation and analysis of microelectronics using lab instruments.

Concurrent enrollment in ENGR 351

Outcomes: Identify integrated circuit design issues and develop applicable solutions. Apply advanced principles in analog circuit design, creation and analysis.

Components: Laboratory(In person)

Requirement Group: Co-requisite: ENGR 351. Restricted to Engineering Science majors.

Req. Designation: Internship

Room Requirements: ENGR Design Lab(1)

ENGR 352(3) Course ID:013581 15-JUN-2022**Methods and Algorithms for Computer Engineers**

ENGR 352 is the second semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The areas of emphasis are the analysis of the methods and algorithms used in computer engineering. The course includes hands-on experiments and a design project related to the computing performance and efficiency improvement of engineering systems

Restricted to Engineering Science majors. Prerequisites: ENGR 351, ENGR 351L, each with minimum grade of C-, concurrent enrollment in ENGR 382.

Outcomes: Evaluate the design and implementation of methods and algorithms in computer engineering. Analyze the performance, efficiency and computational complexities of algorithms using the time-and-space tradeoff.

Food, Hunger and Power in the Modern World

This course explores how conflicts over food shaped the modern world. We compare shifting interpretations of famine (in Ireland, India, and Ethiopia), and explore how food became a "weapon of war" during the World Wars. Finally, the course analyzes how race, gender, and class shaped American food and welfare policies.

Acquire exposure to varied methodological approaches to studying food and hunger; complete a historical research project; learn the relevance of food for many pressing contemporary concerns.

The Holocaust: History and Memory

This course explores a defining event of modernity, the genocide of Europe's Jews, by exploring Nazi actions, victims' varied experiences, and international reactions. We will also tackle questions like: Was the Holocaust unique? What does it mean to be a "bystander"? What are the politics of memory and commemoration?

Outcomes: Students acquire a sense of the causes, processes and implications of recent genocide. They are challenged to develop the outlines of a theory for predicting when genocide is likely to occur and to provide a clear definition of the term. Most importantly, they articulate from the historical data ways to prevent genocide.

Western Traditions - Antiquity to the Middle Ages

This course,(and its companion, HONORS 102), opens perspectives on works that have shaped the self-understanding of the Western intellectual tradition. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty.

Outcome: Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time. Written and visual expressions of these themes are examined in relation to the political and cultural

NEUR 101(3) Course ID:013816 01-MAY-2020

Introduction to Neuroscience

This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), physiology, neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas; laying a foundation for advanced coursework in neuroscience.

Pre-requisite: None; Recommended: BIOL 101 and PSYC 101

Outcomes: Knowledge of the organization of the nervous system, cellular events that underlie emotions, learning, and behavior, and awareness of classical and modern methods for advancing the field.

Components: Discussion(In person), Lecture(In person)
Attributes: Neuroscience
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1), Electronic Classroom(1)

NEUR 300(1) Course ID:005481 15-JUN-2019

Seminar in Neuroscience

Prerequisites: NEUR 101 with grade of C- or better.

The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. NEUR 300 is cross-listed with BIOL 303.

Outcome: Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses. Students will complete one midterm essay and one final essay exam that will reflect their understanding of the topics discussed in the seminars.

Components: Seminar(In person)
Course Equivalents: BIOL 303
Attributes: Neuroscience

Laboratory in Neuroscience I

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. This course is cross-listed as NEUR 301 & PSYC 388.

Prerequisites: NEUR 101, BIOL 251; and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

Outcomes: Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques.

Components: Laboratory(In person)
Course Equivalents: BIOL 373, PSYC 388
Attributes: Neuroscience
Requirement Group: Prerequisites: NEUR 101, BIOL 251, C-. Students must be either a Molecular/Cellular Neuroscience Major

NEUR 302(3) Course ID:005484 01-APR-2011

Laboratory in Neuroscience II

Prerequisite: NEUR 301

Students will receive additional training and experience in specialized laboratory methods and techniques used by Loyola faculty in their Neuroscience research.

Outcome: Students will have the opportunity to conduct independent research projects in faculty and student laboratories. This experience will help prepare them to contribute creatively to neuroscience research. Students will be assessed as to the quality of 3 items: 1) a written proposal for the independent research project; 2) a 'meeting quality' scientific poster; and 3) a written 'publication quality' scientific paper summarizing the work done for the independent research project.

Components: Laboratory
Attributes: Neuroscience
Requirement Group: Prerequisites: Restricted to Neuroscience Minor students.

The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

Language Demands and Development in Disciplinary Classrooms

Everything we do in classrooms and schools requires language, yet the nuances and complexities of language are rarely explored in educator-preparation programs. As the population diversifies and more students come to schools with competencies in languages other than English, teachers must understand how language works so that they can support students in developing language spanning grades and disciplines. In this course, teachers will explore the language demands within and across academic disciplines and enact scaffolds to support multilingual students; language development by attending to these demands. Course understandings and related pedagogical practices emphasize the value of students; multilingual repertoires and competencies with foci on building metalinguistic awareness and encouraging translanguaging with students; languages and language varieties. Pedagogical practices will focus primarily on building classroom environments to support students; language development, including contextual features,

Social Justice for Multilingual Learners

COURSE DESCRIPTION This course introduces educators to foundational principles and practices for promoting social justice and educational equity while teaching multilingual learners in today's classrooms. A central component to teaching for social justice for students labeled as English learners (ELs), this course prompts educators to deconstruct their identities, experiences, and perspectives on cultural and linguistic diversity as a means to recognize and deconstruct language ideologies, deficit-based perspectives, personal biases, and institutionally driven assumptions. Framed by larger sociolinguistic and sociopolitical themes in the field of EL/bilingual education, educators explore students; diversity in their classrooms and schools and reflect upon current practice with that lens. Participants then draw from the literature to develop personal philosophy statements for serving multilingual learners with goals for their own professional learning.

Literacy Teaching for Bilingual & Multilingual Students**COURSE DESCRIPTION**

Literacy is widely seen as one of the most important skills that children need in order to be successful in school and beyond, however the teaching of reading and writing are largely still approached from a monolingual paradigm even though the vast majority of classrooms have students who speak (and are often literate to varied degrees in that language) in at least one other language beyond the language of instruction. Therefore, it is essential that educators acquire the knowledge and skills to consider the development of literacy from a broader, less restrictive linguistic paradigm in order to engage and effectively teach reading and writing to their students who are bi/multilingual. Regardless of teaching context (e.g., grade level;

Prerequisite: RMTD 420

This course is an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.

Prerequisite: RMTD 421 (B or Better)

Outcome: This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics. Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral

Bringing Language, Learning & Dev Theory into Practice

In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.

Outcomes: Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with

Teaching, Learning and Leading with Schools and Communities Internship: Student Teaching

This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module.

School of Education - Teaching, Learning & Leading - Subject: Teaching, Learning & Leading**TLSC 401(2) Course ID:012795 15-APR-2014****Language, Learning & Development Theories in Practice**

Students will learn key principles and stages of language acquisition, developmental and learning theories through clinical experiences with children from birth to grade 12. Field experiences provide opportunities to explore ways in which physical characteristics, communication skills, cognitive capacities, and the social-emotional needs of children are used to understand theory and inform adult-child interaction and developmentally appropriate practice.

Outcome: Students will explore the ways in which social, cultural, and environmental contexts shape language, development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12.

Catholic Bioethics in Clinical Practice
 This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.

Outcomes: This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics.

Catholic Bioethics and Social Justice
 This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.

Outcomes: Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context.

Basic Human Anatomy

Enrollment limited to Masters of Science in Physiology students.

This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.

Outcomes: Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine.

Components: Lecture(In person)

Requirement Group: Restricted to students pursuing a M.S. in Physiology.

EXCM 115(1) Course ID:013604 01-JUL-2019**NCCA Personal Training Elective**

This course encompasses an overview of key Exercise Science, training methodology and health behavior change principles. Students will then apply each principle into practice through screening and evaluation, exercise program design, and ethical, legal and professional responsibilities and guidelines.

Upon successful completion of the course, the student will be able to: Apply key exercise science, training methodology and health behavior change principles in context to the provision of exercise. Apply the practice of exercise and fitness screening and assessment, health appraisal and risk stratification, while simultaneously integrating ethical considerations and client preferences.

This course encompasses an overview of group exercise; to include cardiovascular exercise, strength training and stretching. Students will learn how to lead, instruct and motivate individuals or groups in exercise activities.

Outcomes:

Upon successful completion of the course, the student will be able to:

- Apply effective, exercise science-based group sessions for different fitness levels.
- Explain proper technique, demonstrate exercise, and teach appropriate methods to strengthen and stretch certain muscles.

This course presents perspectives on physical activity and exercise science specific to women. It will include the identification of issues during various stages of development in the female body and barriers and benefits of exercise unique to women. Students will apply these perspectives to exercise program design and health care interactions with all clients.

Outcomes:

- 1) Understand the unique circumstances and outcomes of working with women in the field of wellness and fitness.
- 2) Identify preventative strategies (such as exercise prescription and nutrition guidance) that can compensate for health risks, issues, and deficiencies that female clients and patients may experience

This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.

Outcomes:

1. Understand theoretical approaches that drive motor control and motor learning research.
2. Analyze principles and processes underlying movement skilled performance.

Prerequisite: admission to LDI.

This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

Public Health Practice and Management

This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.

Environmental Health
 Epidemiology is the study of the distribution and determinants of disease in populations. This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

Introduction to Epidemiology
 Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

Design for Circular & Sustainable Business

This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions.

Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students

Outcomes: Understand the role of design in creating a sustainable future. Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods.

Components: Lecture(In person)

Requirement Group: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students

Climate Change and Human Health

This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.

Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing

Outcomes:

1) Outline fundamental public health concerns that have been associated with climate change.

Components: Lecture(Online)

Natural History of Belize

This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.

Pre-requisites:

For SES majors and minors, ENVS 101 or ENVS 137;

For BIOL majors and minors, BIOL 102 and BIOL 112;

For ANTH or GLST majors and minors, Junior or Senior Standing.

Components: Field Studies(In person)

Conservation and Sustainability of Neotropical Ecosystems

This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.

Pre-requisites: ENVS 280 or BIOL 265; Instructor Consent Required

Outcomes: Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture.

Components: Lecture(In person)

Course Equivalents: BIOL 349

Industrial Ecology

Industrial ecology combines Business, Environment, & Engineering to shift industrial processes from linear (open loop) systems, where resources move through the system to become waste, to circular (closed loop) systems where waste becomes inputs for new processes. Students will learn life cycle assessment (LCA) to measure environmental impacts.

Prerequisite: ENVS 363/463

Outcome: Students will understand how business and industry can create zero waste systems, how a circular economy works, and the tools of industrial ecology, including life cycle assessment.

LAW 473(2) Course ID:013271 15-MAR-2018**Class Actions**

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as human beings have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise

Law & Catholic Social Thought

On its website Loyola University Chicago defines itself as "Chicago's Jesuit, Catholic university." It also makes clear that Loyola is fiercely dedicated to promoting "social justice." Likewise, in its Mission Statement, the Law School claims to be "inspired by the Jesuit tradition" and that it seeks "to prepare graduates who will be ethical advocates for justice and equity."

Did you ever wonder what this means? What is the justice that Loyola claims to support?

There are, of course, many ways of defining justice, and many critical perspectives through which law may be examined: Law & Economics, Legal Positivism, Classical Liberalism, Rawlsian Welfare State Liberalism, Legal Feminism, Legal Realism (and its successor Critical Legal Studies) and Critical Race Theory. This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules,

The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

Comparative Criminal Procedure focuses on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system.

These points of comparison include the role of the judge/magistrate; the prosecutors role and plea bargaining, the role of defense counsel, the role of evidentiary and constitutional rules of exclusion of evidence, and, as an example of the substantive criminal law, the law on rape. Course materials include a short, thoughtful critique of the American system, "Trials without Truth", by Professor William Pizzi of the University of Colorado; and a course pack of law review articles. The format is a mixture of lecture and classroom discussion, including role play exercises in witness examination and argument, at trial and at motions to suppress. Three Italian guest lectures are expected to participate as in the past: a prominent magistrate; a defense lawyer/law professor, and a prominent literature/film scholar whose focus will be on

This course will be taught by Illinois Attorney General Lisa Madigan, assisted by Dean Jean Gaspardo. The Attorney General is the state's chief legal officer and is responsible for protecting the public interest of the state and its people through advocacy, legislating, and litigating. Protecting consumers and businesses that have been victimized by fraud, deception or unfair competition is one of the primary functions of the Attorney General. Her office receives 25,000 consumer complaints each year. In her many years of service since 2003, Attorney General Madigan has gained a solid, national reputation for prosecuting offenders perpetrating fraud against Illinois consumers. Most recently, she paired with a couple of other mid-west states Attorney Generals to prosecute the many big banks [too big to fail] for their predatory lending tactics, recovering billions of dollars. The course will focus on Consumer Law, including the role of the state in enforcing legislation protecting consumers. The course will also address the role of private

The aim of this seminar is to provide students with a deeper understanding of the Supreme Court of the United States, its personnel and work, and the important role it plays in American government and society. Students will consider the processes by which Justices are appointed to the Court; the standards and processes the Court uses to choose cases for review and decision on the merits from among the multitude decided each year by the lower courts, leading to the creation of precedents of national applicability; the ways in which advocates endeavor to persuade the Court that it should (or should not) grant review in a particular case; and the ways in which the so-called "merits cases" (those in which review has been granted) are briefed, argued, and decided. A substantial part of the semester will be devoted to the study of a small number of cases currently pending before the Court, either as candidates for review or for decision on the merits. LAW 193(2) Course ID:014203 24-MAR-2021**Diversity and Inclusion: A Professional and Social Responsibility**

This 2 hour course will examine the legal profession which remains one of the least diverse of American professions. Lawyers have unique and varying roles as counselors, advocates, confidants, government officials, adjudicators, and civic leaders. In this course, students will have an opportunity to learn about the legal profession's diversity and inclusion history and challenges, organizational and individual roles and strategies, and current research. This course will engage students with lectures, guest speakers, group discussion, and readings--all materials will be provided by instructors. There will be no cost to the students for materials utilized in this course.

There will be a final presentation where students can discuss and elaborate on important topics in the legal profession. Students will gain a deeper understanding of how diversity and inclusion efforts intersect with professional responsibility and its impact on social justice.

This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgements in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed.

LAW 197(2) Course ID:007394 25-OCT-2013**Advanced Business Organizations including a Comparative Perspective**

This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between shareholders and the board, directors; elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students

LAW 199(2) Course ID:012628 26-JUN-2013**Business Valuation**

Attorneys play an active role in business transactions every day in connection with mergers and acquisitions, estates and gifts, divorce, filings with the SEC, etc. This includes attorneys who are in private practice or in with a company. Understanding business valuations and financial statements form a cornerstone of most of these transactions. In fact, the business world today and the financial work involved demands that today's lawyer understand the value and financial reporting of a business. This course will help attorneys to better understand the methodology and techniques involved in business valuations. This will also include basic financial statement analysis. Topics will include the proper standards for valuation, valuation methodology, cash flow analysis, financial analysis techniques, financial reporting issues, international standards, and specific uses of valuations.

School of Law - Law Department - Subject: Law**LAW 200(1)** Course ID:009799 28-FEB-2012**Emerging Issues in Public International Law**

Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law. The sexual exploitation and trafficking of minors has reached a crisis point, both in the United States and abroad. The United States Congress has responded to this ever-increasing threat by passing extensive legislative enactments aimed at deterring this pernicious activity, providing severe and often controversial punishment for those who engage in it. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. Similarly, members of the judiciary, as well as victim

This seminar will take an interdisciplinary approach to the intersection of environmental and energy issues. It will introduce students to a variety of solutions to the problem of pollution from the energy sector. The course will start with a legal and technical introduction to the electricity grid, including discussion of federal/state jurisdictional issues, basic engineering concepts (taught with lawyers in mind) of the grid, and the basics of regulated and deregulated electric markets. The class will then address issues involving emissions and emission prevention, including the Clean Air Act (Title V and recent coal emission rules), renewable energy (including state incentives, Commerce Clause issues, and basic market design issues), and carbon capture/sequestration (including liability issues and state incentives). For their research papers, students will propose emission-reducing programs for a hypothetical state with a hypothetical electric market and evaluate the arguments for and against those proposals, including any unintended consequences.

LAW 227(2) Course ID:012629 26-JUN-2013**Transportation Law**

Transportation and logistics is a multi-trillion dollar industry. Every item you purchase or use in your everyday life was delivered by a truck or other mode of transportation (rail, ocean, air). America could not function without the transportation industry. There have been a series of deregulations affecting the transportation industry over the years. After September 11, 2001, cargo security became an important issue for the United States, which lead to many new laws and regulations. This constant roller coaster of deregulation and regulation makes being a transportation attorney very exciting. This course will briefly describe the different modes of transportation and the regulating bodies for each. We will focus on the surface modes of transportation, namely trucking and rail. The main topics discussed will be contracts, tariffs, liability for loss and damage to cargo, tort liability of shippers, carriers, customers, and brokers during and after the transportation of freight and a comprehensive understanding of insurance and the various

Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law.

This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest - based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. LLM students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required.

Section 001 (2 credits) Human trafficking is one of the most egregious crimes that occurs both globally and domestically. While there have been improvements to both global and domestic responses to human trafficking, children who are compelled into forced labor and sexual exploitation continue to be the least identified cohort of survivors. This interactive and interdisciplinary seminar will explore the legal, social, and practical issues confronting children who are survivors of human trafficking, as well as an examination of efforts to prevent and intervene in this social problem. While the seminar will focus on unique issues affecting (international and US citizen) survivors of child trafficking, students will gain knowledge and skills that are applicable to other marginalized populations of children and youth, as well as adult trafficking survivors.

This course will examine the way the three Abrahamic Faiths (Islam, Judaism and Christianity) consider legal and policy issues. For instance we will look at the three faiths regarding various issues surrounding human rights and life and death issues such as: justified uses of war and violence; conscientious objection; end of life issues; capital punishment; criminal responsibility for causing death; positive duties to the poor and needy; and how the common good is described by the three religions. How do the three faiths envision translating their perspectives on the issues into civil law, and what are the proper limits on enacting religious perspectives into positive law?

This course will examine the role of these guiding principles in the various stages of the criminal justice process, such as the means by which information is gathered during an investigation, the circumstances under which an individual can be detained, and the type of evidence that can be used at trial. The course will focus on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutor's role and plea bargaining; the role of defense counsel; and the role of evidentiary and constitutional rules of exclusion of evidence. We will compare our criminal justice process to that of Italy and other countries, and Italian officials will participate as guest lecturers to talk about their own experiences with the Italian system. Refugee Law and Policy: Welcoming the Stranger

Refugee law is one of the most dynamic and rewarding areas of law. Nonetheless, in observing the administration of refugee law, we bear witness to some of the United States' most egregious human rights abuses and the abandonment, in some cases, of the rule of law. The goal of this course is to teach students the history of the norm of non-refoulement, in doing so to understand how political, religious, racial and other minority groups are intended to be protected (from persecution, from torture, and from death). Students will learn the history of the Refugee Convention-for whom the document was written, and, consequently, who is left out of protection (considering for example the treatment of victims of private-sphere persecution or climate refugees). Students will learn the role of xenophobia, racism, and subjugation of the "other" in this case the "alien"-other in administering the rule of asylum law. The class will contain a comparative analysis of refugee law under various international and domestic systems. Finally, students will learn about

International Arbitration

This is a one credit course taught sometimes in one of the summer programs. In this course, students will learn how international commercial arbitration works. In most international contracts, the parties agree that all disputes will be resolved by arbitration. This private dispute mechanism provides a number of advantages over litigation. One of the most important advantages is that by agreeing to arbitrate, a party avoids ending up in the other party's court system. An arbitration award is also more easily enforced in a foreign jurisdiction than a court judgment, because of an international treaty known as the New York Convention. Students will learn about the various laws and rules governing international arbitration, as well as specific, practical knowledge about arbitrating, such as how to draft an arbitration clause, how to choose an arbitral institution, how to select arbitrators, the ethical rules that apply to arbitrators, the bases for challenging arbitrators, the conduct of the arbitral hearing, rules governing admission of evidence,

The course is designed for law students who are looking to supplement their existing knowledge of the language with Spanish that focuses on the legal field. Its main objective is to develop adequate communication skills that will allow you to advise Spanish-speaking clients on issues related to criminal, property, civil, labor, administrative, tax, commercial, and litigation law.

We will work with real documents and texts, analyzing cases, as well as reinforcing knowledge of both Spanish in the legal field as well as of different branches of law in the judiciary system. Coursework will be carried out in groups, and a system of continuous evaluation will be implemented using assignments and projects. The course will also include a cultural component, the aim of which will be to understand, contextualize, and handle effective exchanges with Spanish-speaking clients.

Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

LAW 316(2) Course ID:013485 07-JUL-2017**Hedge Funds**

There are over two trillion dollars invested in hedge funds; investment giants that move and shape today's international financial markets. Yet many do not understand their significance or their complex workings. This course is designed to give you a practical understanding of hedge funds and the documentation that supports the formation and operation of these funds. We will examine the regulatory, compliance and business issues surrounding hedge funds and provide tools for successful fund implementation. We will also explore practical concerns with the Investment Advisers Act of 1940 and the Investment Company Act of 1940 as well as current changes to the regulatory scheme, including Dodd-Frank. Prerequisite: Business Organizations. Securities Regulation is not a prerequisite but will be helpful.

School of Law - Law Department - Subject: Law**LAW 324(2 - 3)** Course ID:004533 19-DEC-2013**State Constitutional Law**

This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution afford. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.

LAW 325(3) Course ID:004534 16-OCT-2014**Conflict of Laws**

This course deals with the legal ramifications of disputes involving contracts with two or more states or other jurisdictions. When such disputes reach the courts, what law should be applied and how should the determination be made? The course explores these questions and the various methods courts and scholars have proposed and adopted to answer them. The contrasting points of view regarding choice of law, jurisdiction and recognition of foreign judgments are analyzed in terms of which policies best promote harmony and efficiency in the federal system and accord with the federal constitutional requirements of due process of law and full faith and credit to the judgments of sister states .A special focus this year will be on the application of these areas of law to family law issues.

LAW 326(2) Course ID:014326 18-MAR-2022**Reviewing and Righting Wrongful Convictions**

The course explores and addresses the causes of wrongful convictions. We will also explore how the law has changed in response to what we've learned about wrongful convictions. Among other factors, the course will specifically consider interrogations and false confessions, forensics and their (mis)use in the criminal law, and eyewitness testimony and memory and factors that may make it fallible. The course will draw from case law, national academy of science reports and related research, and multidisciplinary research in the areas of psychology, social sciences, and the law. The course will also focus on solutions: how have system actors responded? What changes in law have emerged? What changes in practice, including practices in prosecution or police departments. We address the systemic causes of wrongful convictions and consider the impact of such convictions on men and women of color, particularly on Black men and teenagers, who have been disproportionately impacted.

This course will explore the application of economic principles to legal doctrines. The economic approach to law seeks (1) to explain, at least in part, why certain legal rules exist; (2) determine the consequences of legal rules by identifying the incentives created by a legal framework; and (3) provide guidance about how legal rules should be structured or ambiguities interpreted. The course is intended to enable the student to develop an understanding of the economic implications of legal rules, how economic concepts can be incorporated into legal rules, and how economic analysis fits into litigation. Topics covered will include the economics of property, torts, contracts, crime and punishment, and more.

American Legal History

Deep controversies over political issues present now; immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us; slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

Storytelling and Presentation Skills for Lawyers

This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. Nonprofit organizations play a crucial part in the U.S. economy. Among other things, they account for almost 10 percent of the wages paid in the United States, and they account for more than 5 percent of the country's GDP. This class will go over the laws that govern this nonprofit activity, including the organization and operation of nonprofit organizations under state law, the rules governing federal tax exemption and charitable deductions for donors, and the laws that govern noncharitable nonprofit organizations. By the end of this class, you should have basic knowledge that you will need to advise nonprofit boards of directors of their legal obligations and ensure that nonprofit organizations comply with relevant federal and state laws.

LAW 391(2) Professionalism	Course ID:013423	06-MAR-2017	
Exposure to attitudes and characteristics which act as the basis for success as a true professional in the practice of law. The class will present perspectives on how to succeed as a new lawyer, given expectations and competitive environment. The class will expose the traits identified by others that will equip law students to grow into lawyers who have true professional and personal success. The experience will aim to provide a framework of skills that are considered indispensable for professional success that are not otherwise the focus of attention in the traditional law school curriculum. Subjects such as civility, self-awareness, resilience, the setting of focused values, duties of confidentiality and competence, and other strategic goals will be explored. In sum, this course will be an experience in reflection, goal setting, and exposure to the realities awaiting the post-law school experience in the legal profession.

The purpose of this course is to prepare students for the opportunities and personal financial challenges they will encounter during their legal careers. My goal is to show each student that strong financial habits are crucial and beneficial for all types of attorneys and all levels of income. Students will learn that it is possible for all of us to obtain financial freedom, which translates into the power of choice. When we have the power to choose, we have the power to live a life that conforms to our personal values, including the strong values instilled upon us at Loyola. When we are not encumbered by poor financial choices, we are free to choose our professional focus, to share our talents with the disadvantaged members of our community, and to work on passion projects. Importantly, we can choose to spend more time with loved ones.

Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

Documenting and Negotiating Finance Transactions

This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Prerequisites: Students taking this class will be expected to have taken Business Organizations. This course begins with an exploration of the legal and political structure of American education, including issues such as: (1) the role of government in mandating education; (2) the relationship between state and religion in the educational process; (3) the governance of educational institutions and the shaping of curriculum; and (4) the rights and responsibilities of teachers and students. The American legal system's resolution of these difficult issues are then compared to the resolution of these same issues by legal systems in other countries. Finally, students are asked to question the fundamental assumptions underlying the American educational system based on their understanding of different assumptions underlying the educational systems in other nations. Students are required to help to facilitate class discussions and to prepare a paper that analyzes critically an issue raised in the class.

This course has several objectives. It offers the student an opportunity to study several important torts topics not usually covered in the first year, such as products liability, misrepresentation, and business torts. It also offers an opportunity to consider whether tort law is a just and efficient way to resolve disputes and provide remedies for personal injuries and other types of harm. Perspective readings on tort reform evaluation will be included. Students also will conduct research on a topic of the student's choice and present findings to the class. The grade will be based on the quality of the presentation and a two-hour take home exam.

LAW 470(1 - 4) Course ID:013595 14-OCT-2021**Immigration Practicum Advancing**

Immigration law is one of the most complex, dynamic, and rewarding areas of practice. Yet, it is often viewed as a specialized field that rarely is connected to other public interest areas of law, including child and family law, poverty law, housing, education, health, and criminal justice. The goal of this course is to teach the current realities of immigration law as experienced in practice, and to show how it intersects other field of public interest law in the pursuit of social justice. This unique course has a classroom component and a field-work component.

The class meets formally two hours per week in the evening to cover substantive immigration law issues, current topics/changes in immigration practice, and to develop practical skills tailored to the practice of immigration law practice and advocacy, with an emphasis on issues affecting families and children. Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets.

As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and

LAW 476(3) Course ID:011958 21-MAR-2011**Art Law**

Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

This course counts as a Comprehensive Simulation and Skills Course

There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well.

Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net revenues (having no private shareholders or owners), and often are formed and operated to qualify for Federal income tax exemption under Section 501(c)(3) or other provisions of the Internal Revenue Code. Nonetheless, they have many of the same operational needs and characteristics of any other business. They occupy space

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite.

LAW 546(1) Course ID:012503 27-JUN-2018**Anatomy of a Deal**

This weekend course will provide an introduction to the essential skill set you will need as an entry-level M&A deal lawyer. This is increasingly important, in light of growing client unwillingness to pay junior associate rates for attorneys to learn on the job. Facing an ever more competitive recruiting environment, it will be crucial for you to come out of the gate armed with the appropriate skill set for your chosen practice area. This course is designed to prepare you to speak intelligently in interviews and hit the ground running on the job. To this end, the focus of the class will be the basics of a typical M&A transaction, including how to perform due diligence and how to review and draft resolutions, share purchase agreements, third-party opinion letters, and other closing documents commonly assigned to junior associates. You will also study sample form agreements that appear in many different types of deals, including share purchase agreements, debt documents, confidentiality agreements and escrow agreements. When appropriate, we may invite guest

LAW 547(2) Course ID:012525 19-DEC-2012**International Patent Law**

The management of large international patent portfolios (comprising patent applications filed in several jurisdictions), and an understanding of law and treaties affecting those portfolios, is fundamental to international patent practice. We will discuss the basics of filing and prosecuting patents under the Patent Cooperation Treaty (PCT), including issues that may arise when prosecuting a US application under the PCT. We will also consider other multinational patent treaties commonly used in foreign patent application filings that affect the management of international patent portfolios and US patents. We will take a comparative look at several aspects of U.S. and foreign patent laws, and will consider current controversies surrounding patents in the international arena.g., regarding access to medicines and the patentability of business methods and other controversial subject matter. Patent Law is a prerequisite. This requirement can be waived only with the permission of the instructor.

Loyola is offering a full-day Boot Camp for students who are or will be working at public interest organizations. The one-credit Boot Camp will focus on a wide range of issues intended to make your public interest work experience more productive and successful. Discussions will focus on topics such as what organizations expect from law students, how to more effectively handle assignments, what resources are available to help with research and drafting, and how to better deal with, and possibly avoid, some of the pitfalls associated with public interest practice. Emphasis will be placed on professionalism, identifying certain basic institutional do's and don'ts.

Law student attendees will receive instruction in how to navigate and use Illinois Legal Aid Online, an extraordinary research tool for the legal aid community. They will also have the opportunity to participate

A practical skills course on 4th Amendment/Search & Seizure law as it applies in Illinois, and how the most common issues are litigated in criminal cases. The class explores applicable Illinois statutes, Illinois Supreme Court rules, and federal and state case law that sets forth the prevailing legal basis for individuals' rights against unreasonable search and seizure. Taught by a Cook County Assistant State's Attorney and with question and answer sessions with a defense attorney and law enforcement; the course takes a balanced look at both the prosecution and defense approaches to Motions to Quash and Suppress, the bread and butter of pretrial litigation and the chief avenue for deciding 4th Amendment issues. After learning the legal basics, students will be tested on their ability to identify and analyze Search & Seizure issues in various scenarios and argue for or against 4th Amendment violations, as well as, practice some basic motion writing and oral arguments.

Electronic discovery ("e-discovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts).

Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and

Animals (meaning comprehensively for this purpose non-human mammals, birds, reptiles, fish, and insects) are central to our world in a myriad of ways. Historically, and still today (not without controversy and for better or worse depending both on degree and on your perspective), animals were and are a major source of food, as well as a tool of production as farm labor, transportation, policing and security, military activities, and entertainment and education, an object of scientific and medical research, and work as service and support animals. Animals are also key components of and participants in our ecology and environment; after all, they have been on the planet in one form or another 500 million years before the first humans are believed to have emerged (and, even then, Darwin might point out that we have them to thank). Moreover, companion animals have been sources of friendship, companionship, and love throughout centuries and especially in modern society where they are often viewed as family members and not as

History of the Federal Judiciary

People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I

Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say." [1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing deals]" [2] are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or

In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It

Legal Issues in Student Discipline

The legal issues surrounding student discipline in public elementary and secondary schools involve the intersection of Constitutional and statutory law with the administrative hearing process. By developing a working knowledge of the school disciplinary process, course participants will build analytical and substantive skills applicable to a wide variety of practice areas.

The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about `zero tolerance; policies, the role that school discipline plays in the `school-to-prison pipeline,; and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include

This course examines the legal relationships among children, families, and the state. Areas of law to be examined include child welfare, education, and juvenile justice. The course will explore Supreme Court jurisprudence on the issue of parental rights and family privacy as well as the doctrine of children's rights. Attention will be paid to the role of race, gender, and class and their intersection in shaping the ways in which children and families interface with governmental systems. Students in the course will be asked to grapple with critiques of governmental systems impacting children and families, explore calls to reconstruct and reconstitute these systems, and examine the role of lawyers working from within and outside these systems.

Juvenile Justice			
In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare? Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment.

This mediation course allows students to mediate family cases through several community projects. Students are required to have participated in some type of 40-hour mediation training in order to register for this course. These students receive additional training in family mediation, co-mediation and related issues. Students mediate in family group conferences and other multiple party mediations. Students participate in multiple simulation and mediations and receive feedback on their skills. The course meets once a week for the two hours for most of the semester, however students are also required to mediate at other times during the semester. There is no examination. Grading is based on participation in mediations, simulations and discussions and self-evaluations. Students may take the course for 1 or 2 credits. For 2 credits, a paper on mediation theory or practice is required. Where the student is taking the course for 2 credits, the research paper is included in the grade. Enrollment is limited to eight students.

The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults.

The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience.

LAW 681(1) Course ID:012836 26-FEB-2015**Child Law Seminar Series**

The course will run 14 weeks, with seven live lectures and seven weeks of assigned readings to introduce you to each live lecture topic. There is one Module for each topic. Each lecture will be presented by different legal experts and scholars on emerging topics in child and family law.

Students will be expected to participate either in every live class or to listen to the archive if synchronous attendance is not possible. Students will be asked to write a 3-5 page (double spaced) reflective paper at the end of the term choosing from ONE of the lecture topics. The paper should describe how the lecture enlarged or changed the student's understanding of the topic, or in the alternative, how it influenced or changed your professional practice in child advocacy or in related fields.

The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about 'zero tolerance' policies, the role that school discipline plays in the 'school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts; responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.

LAW 684(2) Course ID:013449 05-SEP-2017**System Consultation in School Discipline Reform**

The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and

This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

LAW 686(2) Course ID:013450 15-JUN-2017**School Discipline Reform: Linking Law, Policy and Practice**

This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments; ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making. Students will also learn how to conduct racial equity impact assessments and how the absence of this work has impacted policy decisions in the United States in the past.

Bioethics, Law & Policy

This course provides an overview of American law as it relates to emerging ethical issues in medicine and health care. It is intended to give students an appreciation of the ways in which medical practice and decision-making are guided by modern American principles of constitutional, tort, administrative, and criminal law. Students will learn how the law's regulatory powers have been used to set boundaries in medicine, and, in turn, how theories of medical ethics and practice have informed modern legal developments. Topics covered vary from year to year, but may include issues in end-of-life care, research ethics, reproductive autonomy, distributive justice, and genetic technology.

Health Justice Project

The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs.

European Union Privacy Law

European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

Advanced Alternative Dispute Resolution

The course will focus on the substantive and procedural elements of the various forms of alternative dispute resolution techniques in the United States. The class will cover arbitration, negotiations, mediation, mini-trials, non-binding arbitration using legal assistance, and the role of counsel in each of these processes. A significant amount of class time will deal with mediation as well as both administered and non-administered arbitration. The class will address established principles of arbitration law, the various types of arbitrations, the rules governing arbitration, the role of counsel in the processes, as well as the power, responsibilities and ethical requirements of both mediators and arbitrators. The course will combine a traditional lecture format with practical experience designed to provide the student with a strong substantive basis in mediation and arbitration, as well as clinical experience with several mock mediations and arbitrations interspersed during the course term.

Leadership and Strategy

As a leader or manager in your organization, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best. And, you have to do this in a way that preserves the organization's financial health and protects it from legal risks. Your professional success depends directly on your ability to make the right strategic decisions, and effectively lead and inspire individuals, teams and projects. This course is designed to enhance your ability to do this.

This course also will enable students to examine varied approaches to leadership that are based on personal and organizational mission, vision and values. Students will have an opportunity to explore their own values and approach to leadership and accountability.

Students will follow the evolution of a federal criminal case from investigation to trial. The class will focus on one mock problem - which will likely be a federal narcotics investigation that resulted in a two-count indictment. The indictment will allege that the defendants conspired to distribute more than 280 grams of a controlled substance and that they indeed distributed the controlled substance. Because it will be too complex for a one-semester course, I do not recommend that the mock problem include a Title III investigation.

Health Law Seminar Series

This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any prior knowledge in any

This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The course demonstrates how developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action. Students will learn how to use the rich body of documented experience and guidance available on structuring and preparing assessments by learning how to plan and carry out assessments linked, for instance, to justice sector reform, access to justice, the improvement of the legal framework for investment and sustainable business and the control of human trafficking.

PLAW 104(3) Course ID:012073 16-MAR-2020**International Development Architecture**

This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors,

CMAN 375L(3) Course ID:012406 15-APR-2014**Community Health Nursing**

This clinical course provides the student with an opportunity to apply nursing and public health concepts to families, aggregates, communities, and populations. Opportunities to apply epidemiology and risk assessment strategies in a community assessment are provided. The role of the community health nurse as educator is addressed.

Outcomes:

Upon completion of this course the student will be able to:

1. Apply nursing and public health concepts to community assessment utilizing databases and community engagement.
2. Evaluate the provision of health education and/or health information in the community.

Health Care Delivery and Organization

This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.

Outcomes: Upon successful completion of the course, the student will be able to: 1. Distinguish the roles, functions and responsibilities of healthcare system components (i.e., delivery, financing and regulation). 2. Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access. 3. This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.

Outcomes: 1. Apply principles of health care informatics for population health. 2. Apply basic concepts of epidemiology for population health 3. Analyze the role of population health informatics in understanding data, information, & knowledge. 4. Apply population health informatics in surveillance, interoperability and big data contexts. 5. Comparative Effective Research in Healthcare

Prerequisites: GNUR 450 or equivalent required. CMAN 439 and 440 recommended.

Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.

Outcomes: Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population.

Concepts of Professional Nursing Practice

This course explores concepts for professional nursing practice. Major course concepts include the social contract with nursing and society, health promotion and risk reduction, social and cultural factors influencing health beliefs and practices, and the relations between theory, research, evidence and practice. Interprofessional competencies within the structure and function of the healthcare system are addressed.

This course is for RN-BSN students.

Upon successful completion of this course, the student is able to:

1. Explain historical, contemporary, cultural, and policy trends that have shaped nursing

Healthcare Transitions

Patients pass between health care settings, levels of care, health care providers, and their homes and the communities where they live. These transitions require high degrees of care coordination and management to ensure continuity across settings, providers, and levels. This course examines coordination of care and management of transitions across settings, providers, and levels. Models and frameworks of transition and care coordination will be examined, along with the contemporary research in care coordination and transition management. The professional nurse's role in care coordination and transition management in health will be a focus of the course.

Psychiatric Mental Health Assessment Across the Lifespan

This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.

Psych Mental Health Adv Pract Nursing Practicum

The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.

Qualitative Methods in Nursing Research

This course focuses on exploration of inductive qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical, political, and special concerns of inductive qualitative research are emphasized.

Outcomes: 1. Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science. 2. Explain the relationship between theoretical and philosophical foundations and assumptions to the major qualitative research methods. 3. Compare the major qualitative research designs in terms of background, purpose, research questions, data gathering techniques, analytical methods and report of

Common Health Problems of Adults/Older Adults

One course of a three-course sequence, GNUR 514 is designed to prepare the Nurse Practitioner to assume responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing common health problems.

This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.

1. Analyze the role of federal, state, and local governments in population health. 2. Assess population specific health needs using Healthy People and the determinants of health as frameworks. 3. Examine the role of the World Health Organization and non-governmental organizations in population health. 4. Analyze health disparities and needs of priority populations using databases. 5. This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

Philosophy of Nursing: Nursing as a Moral Practice

This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Outcomes: 1. Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy. 2. Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing. 3. Identify presuppositions/assumptions underlying one's positions and the bases for

This course combines 1 SH of didactic and scheduled on-line seminars throughout the semester with 1 SH (75 clock hours) of practicum experience. Project implementation is the focus of the practicum experience. Project management guidance is provided through on-line seminar sessions, in concert with Faculty Directors, and through communication with the student and external mentor. Students are expected to have a DNP Scholarly Project faculty director, an external member and an approved and willing project site in place prior to course entry.

DNP Scholarly Project: Analysis and Dissemination

The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH seminar course guides DNP students through the completion of the DNP Scholarly Project, evaluation of project outcomes through analysis of process and outcome indicators, and dissemination. Methods for dissemination include sharing of project outcomes with project site stakeholders, completion of a manuscript, and exploration of a publication site.

Clinical Practicum for Advanced Practice in the CNS role
This practicum course guides the student toward a synthesis of concepts and content from nursing and related sciences, and toward the application of this knowledge to the advanced practice nursing of patients across the adult age spectrum. Clinical Nurse Specialist (CNS) students are prepared to impact three spheres: client, nurse/ nursing practice and the healthcare system. This course prepares students to make important contributions to health care including: disseminating new knowledge; designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. Clinical experiences are provided in clinical areas related to the student's population as well as area of specialization in order to demonstrate achievement of quality, cost-effective, patient focused outcomes across all three spheres of impact.

Instructional Design Theories and Models

This course covers how theories of human learning can be applied to the instructional process to make it more effective, efficient, and appealing. The course has a two-fold focus: the theoretical principles that have contributed to the field of ID, and how those principles can be applied within practical settings.

Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design

Outcomes: Differentiate/compare/contrast among learning theories, ID theories and ID models. Identify/describe the basic tenets of behavioral, cognitive, and constructivist theories. Identify/describe motivational theories. Select/apply principles in practical learning situations.

Components: Lecture(Online)
Requirement Group: Pre-requisite or co-requisite: CIEP 470

Fundamentals of Learning Analytics

In this course, students will build a foundation for deploying learning analytics to be used in instructional design. The course employs a combination of theory and hands-on experience using business-intelligence tools. Emphasis will be centered on specific models and methodologies in data collection, normalization, visualization, and analysis.

Pre-requisite or co-requisite: CIEP 470 Principles of Instructional Design

Outcomes: Explain learning analytics theory; identify recent trends. Use reporting tools to compile/isolate/summarize data. Differentiate between learning models. Align data models to assessments. Conduct predictive data analysis. Discuss ethics considerations.

Neurodevelopment and Trauma

This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students
