When to Study Abroad

Students majoring in Chemistry often find it easiest to study abroad during their second semester sophomore year. With careful planning, Chemistry students may participate in any semester study abroad program & take their Tier II Core Courses while abroad. Students who come into Loyola with AP credit for chemistry may have more flexibility in when they are able to study abroad, Summer and J-term programs are very popular with all science students and are an easy way to complete core courses, gain internship or research experience, or study a language.
