STEM Pathways to Study Abroad
B.S. Environmental Science

When & Where to Study Abroad
Students studying in the Institute of Environmental Sustainability have more flexibility in when they can study abroad than many other science students. Junior or senior year are often the best time to go abroad, after completing foundational coursework in your major. There are many study abroad programs available that cater to students studying environmental sustainability, and most include a hands-on field work component. Alternatively, environmental science students can reserve their Tier II core courses for their semester abroad and have even more options.

Loyola Programs for Institute of Environmental Sustainability Students
Vietnam
ChinaGreen (Summer)
Belize

Programs with course offerings in Environmental Sustainability
IES Abroad (Institute for the International Education of Students)
- Buenos Aires, Argentina-Advanced Spanish Immersion
- Buenos Aires, Argentina-Latin American Societies and Cultures
- Melbourne, Australia-La Trobe University
