Diverse Viewpoints

Interdisciplinary Programs at Loyola offer you an opportunity to delve into a subject with a wide perspective. Programs such as global and international studies and forensic science are a few examples.

“The many departments and programs within the College of Arts and Sciences invite all Loyola students not only to lay a well-rounded foundation for life-long learning through the Core Curriculum but also to embrace a way of thinking critically that unleashes their deepest intellectual passions,” says Thomas Regan, S.J., dean. “A true Jesuit education seeks to form competent and compassionate ‘women and men for others’.”

Alana Joyce’s Loyola Experience helped her discover her calling. Through her study abroad trips to Rome and Tunisia, Alana realized that her interests lie in political science and international studies. “I feel very well-rounded and I appreciate that from Loyola.”
