Terms and Conditions, Ultra-Low Temperature Freezer

This Black Friday 2017 offer applies to purchase orders for the MDF-U76VC-PA and the MDF-U76VA-PA received from November 20, 2017 through midnight Central Standard Time, November 30, 2017. This offer cannot be combined with any other offers or incentives. This offer is good for new orders only and is not applicable for previous orders. This offer is subject to availability. No substitutions will be made or permitted. This promotion is applicable to sales and deliveries made to Panasonic Healthcare customers within the USA. Additional terms and conditions may apply. Interpretations of these rules, eligibility and resolution of conflicts to this program shall be determined by Panasonic Healthcare Corporation of North America (PHCNA) and all decisions by PHCNA shall be final and binding.

High Performance Biomedical Combo Refrigerator/Freezer

Now available, more than 50% off standard list price.

Protect Stored Biomedical and Pharmaceutical Products, Fresh or Frozen

Our Model MPR-414F-PA delivers a high performance combination of independently controlled temperature, accurate setpoint and uniformity, quick recovery following door openings and resistance to higher ambient temperatures.

- Accurate, stable temperature control meets CDC requirements for vaccine and pharmaceutical product storage according to package insert directives
- High performance refrigeration, airflow and cold-wall systems create an enhanced quality of cold to prevent refrigerated products from freezing and frozen products from uncertain temperatures
- The dual chamber configuration with separate chambers optimizes available floor space
- Interior volume, 12.0 cu.ft. refrigerator and 2.9 cu.ft. freezer
- Temperature range 2°C to 14°C refrigerator, -15°C to -35°C freezer
