ELPC-Loyola IES Internship Program

ELPC-Loyola IES Internship Program Description:
One to two internship positions will be available for the Summer 2019 semester at the Environmental Law & Policy Center. The student will work a minimum 10 hours per week for the spring semester at a rate of $12 per hour for up to a maximum of $2,000 per semester. If students are excellent interns for the ELPC, and desire to stay on longer in order to advance the project they are working on, they are eligible to apply for an extension of their internship for an additional semester or summer. The projects and/or case(s) on which the students will assist are determined by the ELPC, and are subject to change depending on their level of urgency and importance. Students are expected to develop a work schedule that allows the ELPC to know when they can rely on the student intern being present. Students can take the internship for Experiential Learning/Internship credit, and both the ELPC staff and the IES Associate Dean of Academic Affairs will be involved in drafting expectations for course credit and conducting assessments of the student’s progress.

Students who were accepted for this internship in previous semesters are not eligible to apply.

Application and Selection Process:
To be considered for these positions, students will submit a 1-page resume which should include pertinent courses and experiences, and a 1-page statement of purpose which outlines what they hope to do with their career, and how this internship could help them advance their goals and enrich their Loyola experience. Please combine the resume and statement of purpose into one PDF document prior to submitting it. Students submit these materials to Ms. Eniko Racz (eracz@luc.edu) by March 20, 2019. The applications will be reviewed by a committee of ELPC and IES faculty/staff, and one candidate will be selected.

ELPC’s Air Quality team seeks interns interested in improving Chicago’s air quality. Depending on each intern’s skills s/he will:
- Monitor air quality in various Chicago neighborhoods through guided routes with ELPC/community partners or independently;
- Take notes and photos/videos regarding air pollution sources observed while in the field;
- Participate in air quality oriented community service such as tree planting;
- Analyze data;
- Assist with creating and presenting monitoring results’ presentations;
- Help tracking/troubleshooting/replacing monitors/phones throughout the city.

See http://airqualitychicago.org/ for more info on this project.
